SECURITRON SYSTEM # 25

Application

Single door restroom park system

Operation

Outside Operation: doors are unlocked during park hours by use of the DT-7
Inside Operation: in the event there is someone in the restroom when the timer locks the door there is a PB to allow exiting. The MK will allow staff to enter after hours.

Securitron System Components

1 each Timer DT-7
1 each Push Button PB
1 each Key switch MK
1 each Power Supply BPS-24-1
1 each Battery B-24-5
1 each Timer TM-9
1 each Maglock M62

Additional Components Required

TBA Hinges
2 each Closer
2 each Kickplate
2 each Stop
TBA Gasketing (as required)

Options
Point to Point Wiring Diagram

ADDITIONAL COMMENTS: Pushing the PB3ER unlocks UNL-24 on Restroom Door. Once inside the occupant pushes the PB4 to lock out the trigger to the UNL-24 by latching the RLP-24. When the door is opened by the occupant the lock status changes state and resets the RLP-24. The Mortise Key switch, MK, is available to override the lock (should someone pass out, etc. in the Restroom). Red LED indicates Restroom is Occupied and Green LED indicates that the Restroom is available.

COMMENTS: MOST DEVICES COME WITH WIRE LEADS IN DIFFERENT LENGTHS DEPENDING ON WHAT MODEL IT IS. IF LONGER WIRE RUNS ARE REQUIRED 18G STRANDED WIRE IS FINE FOR SHORTER WIRE RUNS ON A 12 V SYSTEM. 22G WIRE IS ACCEPTABLE FOR SHORTER WIRE RUNS ON A 24 V SYSTEM. FOR SPECIFIC WIRE GAUGE QUESTIONS ON LONGER RUNS OR SYSTEMS PLEASE CALL OUR TECH SUPPORT LINE AT 1-800-MAGLOCK OR 1-800-624-5625.

An ASSA ABLOY Group company
Most devices come with wire leads in different lengths depending on what model it is. If longer wire runs are required, 18G stranded wire is fine for shorter wire runs on a 12V system. 22G wire is acceptable for shorter wire runs on a 24V system. For specific wire gauge questions on longer runs or systems, please call our tech support line at 1-800-MAGLOCK or 1-800-624-5625.
